

TITAN TD10 DEF Pump System

Assembly and Installation Instructions

STEP 1

Remove contents from box. Locate TD10 Pump and hang equipment in desired location on IBC.

STEP 2

Using a hose clamp, attach suction hose (shorter hose) to barbed outlet on coupler. The coupler is now ready to connect to the valve installed in the container.

STEP 3

Locate the hose hanger and slide the narrow lip over the desired bar on the IBC.

STEP 4

Install 1" MBSP x 3/4" straight barbed fitting. Using a hose clamp, connect the dispense hose (longer hose) to the fitting.

STEP 5

Hang your dispense hose on the hanger previously installed. The SS nozzle will come with a pre-installed nozzle hook. Hang nozzle on pump housing as illustrated.

STEP 6

Plug system in to a 110v receptacle. (Or connect to a power source if you have a TD10-12V.)

STEP 7

The power switch is located on the bottom left side of the pump housing. Toggle the switch to the "on" position. You are now ready to dispense DEF.
